

Glass100 supplies and installs high quality, durable, pet doors that are specifically designed to be installed into glass panels.

All glass panels that Glass100 Pet Doors are installed into are replaced, as glass must be cut to a final configuration, including finished size and cut-outs, prior to being processed into Category A Toughened Safety Glass. The use of Category A Safety Glass not only protects the safety of the pets using the pet doors, but also any inquisitive small children and toddlers.

Glass100's pet doors are designed to maintain functionality and come with a 12 month warranty against faulty parts.

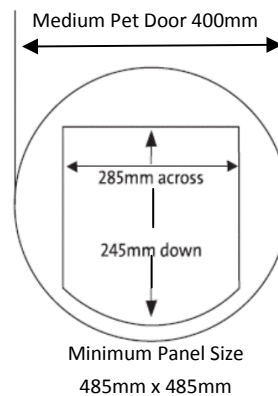

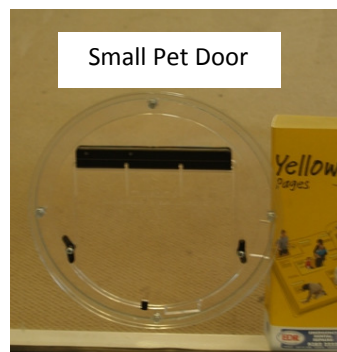

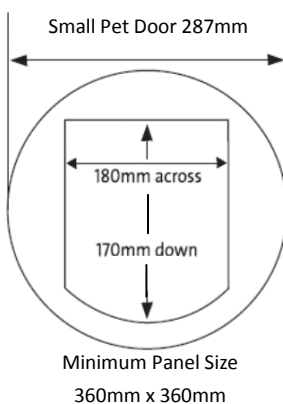

Establishing your indicative price

Step 1— Calculate the area, in square metres (sqm), of the glass panel to be replaced by multiplying the height of the panel in metres by the width of the panel in metres. This is then rounded up to the nearest 0.25sqm ie if a panel is 2.1 metres tall and 0.82 metres wide, the sqm would be $2.1 \times 0.82 = 1.722\text{sqm}$, rounded up to the nearest 0.25sqm is 1.75sqm.

Step 2—Choose your Pet Door. The small pet door is commonly used for Cats, Miniature Dogs and Rabbits. The medium pet door is commonly used for small to medium sized Dogs. Refer to the images at the bottom of this flyer for further assistance.

Step 3—Use the table below to estimate your price by following the column with the appropriate sqm down to your chosen pet door.

Pet door Pricelist * 01/07/2012	Maximum area of the glass panel in square metres (sqm) - Clear Toughened Glass											
	0.25	0.50	0.75	1.00	1.25	1.50	1.75	2.00	2.25	2.50	2.75	3.00
